

***Subject: Resq Health & Safety Training offers affordable American Heart Association (AHA) cardiopulmonary resuscitation/automated external defibrillator (CPR/AED) certification tailored to the needs of educators in the state of Indiana.***

Pursuant to Indiana Code § 20-28-5-3, all Indiana teaching and administrator license applicants (including applicants for renewal of an existing teaching or administrative license) must be trained and certified by the AHA, or a similar organization, in the proper administration of CPR/AED and the Heimlich Maneuver. In response to this requirement, we have formed a partnership with Resq Health & Safety Training to provide you this certification at the discounted price of **\$30.90 per person** through December, 2016. Beginning January 2017, the cost will be \$35.00 per person.

In an effort to make the certification process as convenient as possible, we have established a series of training sessions to be held at the **H. Dean Evans Community and Education Center**, 8550 Woodfield Crossing Blvd, Indianapolis, IN 46240. Classes will be held on the **2<sup>nd</sup> Tuesday of each month** (exception – no class November 8, 2016) through August, 2017! To register for a class, visit <https://resqtraining.com/upcoming-classes-school-cpr/>. Select the **Washington Township Schools** class and date that you would like to attend. Simply register and pay for the class on the website!

If you are unable to attend during one of the offered dates, Resq Health & Safety Training has offered to honor the same rate at any of the open training sessions held at their Indianapolis office. Please contact ResQ directly at (317) 786-7260 to register for training at another site.

**J. Everett Light Career Center** also offers certification for license renewals throughout the school year. For information or to register for a class at JEL, please call the Community and Continuing Education office at 259-5275. The website for Adult Ed. is <http://www.msdtcce.com/>.

**It is never too early to be certified.  
The skills you learn in an AHA CPR/AED class might help you save a life!**
