

## **Master Facilities Committee Meeting 2/10/2016 Feedback (Questions, Comments, Suggestions)**

### **Questions:**

**Q: Is redistricting (even a suggestion at a basic level) any part of the overall campaign of “selling” the referendum to the stakeholders? (I’m thinking of the John Strange/Allisonville talks).**

A: Once we have a project, we will have a thoughtful process for community input regarding needs for redistricting.

**Q: Dr. Woodson’s answer about our relationships with several apartment complexes was appreciated, but is there one that stands out that might work with us to be the example that was alluded to?**

A: We have several designated apartment complexes that we have relationships with in regards to offering tutoring, summer feeding program, etc.

**Q: Could the district leadership come up with 2-3 standardized questions in the next few days we could use to ask our neighbors and community members? This would help eliminate some (not all) bias and help assess the sample size.**

A: Yes, several resources will be made available to share with the community.

### **Comments:**

- Voters who live next to the schools being constructed may ask how the construction noise and actual construction will impact their lives during the time. Will it be safe for them? Will the times cause issues with their daily routine like sleep and dinner? Not only will they be concerned with the kid’s safety but also theirs.

### **Suggestions:**

- Please make sure we have key talking points to talk to people (Parents, senior citizens, etc.)
- Bring back the timer because I feel like we always go over the time limits. Possibly have the next meeting on a weekend morning from 8-12 or a day where having a lot longer time would not be an issue.
