

Master Facilities Committee Meeting 4/27/2016 Feedback (Questions, Comments, Suggestions)

Questions:

Q: What level of tour will community members enjoy when they tour our schools? What steps beyond general signs are being taken to get folks there?

A: The facility tour will highlight key areas that are in need of renovations. Also, as the community members tour the facility they will also have an opportunity to see how we have adapted to current conditions while continuing to provide our legacy of excellence in education. The scheduled facility tours will be posted in every school, online on the district website, and on school's outdoor message boards. Also, phone calls will be generated. In addition, informational facility tour posters will be distributed in various locations throughout the community.

Comments:

- District created FAQ's are terrific.
- Comments about criteria for accepting or denying non-resident applicants are important for people to hear in regards to schools at capacity – Information shared by the Director of Elementary Education was informative.
- Not many people will read a flyer that is posted, so there needs to be a solid idea as to mass advertisement.
- Great process.
- It is critical that we continue to find ways to message the non-resident piece. District information was very helpful. More is needed.

Suggestions:

- Continue utilizing committee members.
